Oops! Broken link? If you've found this page, you almost certainly meant to go to our home page. This broken link is generated automatically every time you refresh it. The fix is below. Your Email Address: Your friend's Email Address: The rapid progress in the field of computer technologies has made it easier for people to access all the news, weather and financial information directly from their home computers. However, users find it hard to configure their desktop to include the data sources that are most convenient for them. Portable XWidget is designed to personalize your home computer screen with weather widgets, RSS feed readers and search tools. Unlike other development tools, this app does not require coding knowledge and uses a visual approach to the design process. You can simply drag and drop elements on the interface and change their size, color or content. XWidget provides you with a wide range of widgets including weather, map and news widgets. The app allows you to configure the widget, adjust its size and even determine the position of the gadget. The program also has a built-in RSS reader that keeps a track of news published on any website. You can select the feed that interests you the most and the app will automatically provide you with updates on the selected websites. In addition, the XWidget includes an effective online news search tool. The app will find news items by searching across the web while you can choose various search parameters. You can even exclude the results you don't want to see by simply clicking on the appropriate check box. XWidget is a convenient tool that will let you access the data sources that are most useful for you. The app can organize your favorite data from any website in one place and can automatically provide you with the most relevant data when you need it. Unlike the traditional desktop widgets, XWidget can be installed on any removable storage device. You can access your favorite widgets even when you don't use your computer. XWidget Portable (version 2.3.0.25) is a practical tool designed to personalize your desktop with weather widgets, RSS feed readers and search tools. Although some Windows version include this feature, the XWidget app is a viable alternative which also offers the option to create widgets. The main advantage of the app is that it allows you to access your favorite widgets on any computer. You just need to install the program on a removable storage device and configure the ones that you want to use. Each widget

What's New in the?

♥ Supports all XWidget versions (3.4.3, 3.4.4, 3.4.5) ♥ Supports both 32 and 64 bit operating systems ♥ The Windows port of the app includes many tools for creating custom widgets. ♥ The plugin is very easy to install with a simple click on the desktop icon. It won't require you to launch the administrator window to install it. ♥ Over 100 widgets are offered in the theme. ♥ All available widgets can be used in combination with the visual tool. ♥ All settings and configurations can be saved and exported to a desktop file. ♥ The app can be used on any computer. ♥ With the mouse through option, you can click on any object on the desktop. ♥ Includes a basic XWidget Designer tool for placing elements and a simple dialog to control the settings. ♥ As a last note, this app supports all languages available for the XWidget version that you have installed. If you are looking for a widget that displays the weather, news or your social network updates, this is it. Twitter Feed Widget displays updates from your Twitter account on your desktop. It is designed to maintain your Twitter stream in real time. Updates for your own Twitter feed, your followers' feeds or the feeds of anyone you follow are displayed in the tool. The widget offers a full visual experience that allows you to easily view and interact with the contents. Users can make comments, direct messages, reply to comments or post images. This information is displayed in a pleasant and clear manner. If you wish to view the activity of a feed, you can add it to your Desktop Favorites section. The widget is completely accessible. You can simply use the mouse through window option to click on any of the embedded items. Additionally, the button can be used to load the social network account and the URL of the favorite feeds you are viewing. In the app, you can find five customizable features. You can select the display options, choose the style, and select a font style or color. Although the app is compatible with any device, it only supports the Internet explorer engine. There are various other widgets you can download for free, including feed readers, RSS readers and others. Popular widgets like the RSS reader, Flipboard and Last.fm all exist in the market. All you need to do is a simple search on Google to find these apps. Twitter Feed Widget Features: ♥ Supports all XWidget
