
Federal School of Distinction School Management Software :

SMART manager is a Business Management System that can be used for Small and Medium Businesses in South Africa. Educational & Business 241. Simple & effective classroom management software. Educational &. An advanced & fully featured employee monitoring software. SMS Pro is a fully featured all-in-one administrative, application and security software suite for small businesses and schools in South Africa. There are three files to install - the 'executable', the MSI installer, and the password for the Windows service. There is also a free trial period, where users can perform the basic functions of the application with no installation or license files. This trial also comes with a guarantee that if the application is not suitable for your organisation, you will be refunded. In addition to this, SMS is a registered company, which means that if your organization changes, SMS is insured, so that if it can't be used any longer, all support costs are covered by SMS (this doesn't include any charges or fees). Each year, SMS produces various editions of its software for new school year and for the global SMS Convention (for schools outside of South Africa) to meet the needs of the South African education system. Problems with SMS SMART manager was developed for South Africa, using the South African education system in mind. However, SMS is limited by this, and many problems have arisen when adapting the product to other countries and use cases. Features The core feature set of SMS includes contact administration, category management, email and calendar management, school management, attendance monitoring and reporting, business application software management, security, and feedback for teachers, parents, students, and administrators. The following features can be found in the SMS user manuals and knowledge bases: Category and Attachments Category and Attachments are used to categorize and organize files and folders. Categories can be created, with a variety of properties such as file type, date added, and date modified. Students, Teachers, Parents, Administrators can create, edit, or delete categories. Each category can have multiple files or sub-categories. When a folder is attached to a category, it becomes a part of that category. Students, Teachers, Parents, and Administrators can attach files to categories. Students and Parents can attach folders to categories and/or to other files or folders. Administrators can attach folders to categories and/or attach files to categories. Attachments can be created
